1. **Introductions**

   **MBAC members present**
   - Co-Chairs Rebekah Scheinfeld, CDOT Commissioner and Luann Hamilton, CDOT Deputy Commissioner
   - Active Transportation Alliance: Jim Merrell
   - CDOT: Mike Amsden, Katie Bowes, Lauren Crabtree, Rosanne Ferrugia, Angel Montalvo, Kathleen Murphy, Charlie Short, David Smith, Amanda Woodall
   - Chicago Park District: Brendan Daley, Matt Freer
   - CMAP: John O’Neal

   **Community Representatives:** Jacob Peters, Joe Sislow, Romina Castillo

2. **Approval of Minutes** – The meeting minutes from September 2016 were approved with one amendment

3. **Bike Crash/Fatality, Vision Zero, and Year-End Updates**
   a. Six fatalities year-to-date as reported by the Chicago Police Department, with zero fatalities recorded in both October and November; the five-year average between 2010 and 2014 based on data provided by the Illinois Department of Transportation is 0.2.
   b. Throughout 2016, a dozen City departments have contributed to the draft Action Plan, setting City priorities and identifying resources. CDOT staff is now collecting input from transportation advocates and citywide nonprofits. The Action Plan calls for extensive community-based outreach and additional planning in High Crash Areas once it is released. We anticipate the release of the Action plan in early 2017. Please send comments and contributions to rmf@chicagocompletestreets.org.
   c. Bicycling.com named Chicago America’s Best Bike City on September 19, 2016.
   d. The Randolph protected bike lane, part of the Loop Link, opened this fall. The lane from Michigan Ave to Clinton St. will be installed in fall 2017. Constructions projects between State St. and Dearborn, and Franklin and Wells, require temporary accommodations until mid-2017.
   e. The 35th Street Bridge opened this fall as well. This pedestrian- and bicycle-only bridge connects the Lakefront Trail to Bronzeville and surrounding neighborhoods. The bridge has built in lighting, ADA access, and is wide enough to accommodate emergency vehicles.

4. **Bicycling Ambassador Year-End Recap** – The Ambassador team attended 800 events during the 2015-2016 season, educating 100,175 people. Events included education at 145 parks, 66 enforcements, and 106 schools. To download a copy of the Final Report, visit [www.chicagocompletestreets.org/education](http://www.chicagocompletestreets.org/education).

5. **Bike Parking** – updates on indoor bike parking for commercial buildings. Benefits of building-supplied bike parking vs. sidewalk racks include more places to park bikes, protection against the elements, and long-term and secure parking spots. More information about bike parking is available at [www.chicagocompletestreets.org/bikeparking](http://www.chicagocompletestreets.org/bikeparking) or by contacting Kathleen Murphy at kmurphy@samschwartz.com.

6. **Friends of Big Marsh** – The Big Marsh Bike Park opened in late fall 2016. The park is ~40 acres, laid out to make maximum use of exposed slag areas. The framework plan includes habitat restoration for wetland, open water, and upland. Amenities include trails and a second entrance/parking lot. Big Marsh water levels will be managed with a new control structure. Ecological goals for the area include enhanced water quality, storm water treatment, invasive species removal, enhancement of wildlife habitat, and management and control of phragmites. Bike Park features include small and large Pump Park, technical single track, jump lines, and a multipurpose trail. More information is available at [www.bigmash.org](http://www.bigmash.org).

7. **Slow Roll Year-End Recap** – Slow Roll hosts its Signature Ride Series every Wednesday evening from May to October. All rides are community based and hosted in partnership with community organizations and institutions. Each ride meets on Wednesday evening at 6:30 pm. The ride starts at 7:00 pm. The Special Ride Series includes any ride outside of the Signature Ride Series. All rides are posted on the Slow Roll Facebook page. Slow Roll also engages in advocacy. Areas of interest include healthy respect for community, culture, and history; community ownership of the planning process; and equitable distribution of bicycle resources.

8. **Community Representative Comments**

   **Q:** How can we help keep the bike lanes vehicle-free?
   **A:** CDOT is working with the Dept. of Finance to address problem areas. When you post blockages on social media, be sure to include the location of the bike lane. Active Trans will share their data with CDOT.

   **Q:** Can rideshare and delivery drivers receive education on not parking in the bike lanes?
   **A:** CDOT is working with BACP regarding this type of education.

   **Q:** What can the community do to identify connection bike lane routes and other lanes for the next budget cycle?
   **A:** Work with your Alderman and local community to support the routes and lanes that will work best for your neighborhood.

   **Q:** How can bike shops get bike racks installed?
   **A:** All requests for rack installation can be made through [bpeakparking.chicagocompletestreets.org](http://bpeakparking.chicagocompletestreets.org)

   **Q:** Can Divvy stations be installed at Ping Tom Park, the 95th Street Red Line, Chicago State University?
A: Divvy is currently assessing the feasibility of how/can we add stations in the next year. You can suggest station locations online at [https://member.divvybikes.com/stations](https://member.divvybikes.com/stations)

9. Public Input/Questions/Comments

Q: Does the city have any connection with Uber and Lyft drivers about regulations?
A: The Department of Business Affairs and Consumer Protection (BACP) regulates rideshare divers and is the best location for their regulation requirements.

Q: Is there anything planned to improve the intersection at Franklin and Washington?
A: CDOT has some ideas and are open to suggestions. Forward suggestions about this intersection to cdotbikes@cityofchicago.org.

Q: When will the Loomis bridge open?
A: The bridge will open in 2017.

Q: City regulations state that bicycle riders over the age of 12 aren’t allowed to ride on the sidewalk. What about giving people over 65 the ability to ride on the sidewalk?
A: The city’s goal is to keep people safe enough so that they would prefer to ride on the street and in the bike lanes.
